HelaBox

Quick Test
about 1 hour

One realistic run-through: run a small group through a meeting in the app, then check the numbers on the web. 20 checks — if they all pass, the release is good. (The full list is TESTING.md.)

20	13	7
checks · about 1 hour	📱 App	🌐 Web

📱 Part 1 — App

A	Log in and add members	2
B	Run a meeting	9
F	End of cycle	2

🌐 Part 2 — Web

C	The group on the web	2
D	Monitoring page (GATA's indicators)	2
E	Who can see what	3

Prepared 23 October 2026 · Dephics for GATA · Tick each box when the case passes; write the result and any notes on the line below it, and log failures on the last page.

Before you start (5 min)

1. Start MongoDB, the API (`cd server && ./pesabox-server.exe`) and the web (`cd web && npm run dev`).
2. Start the app on the **local** server: `cd pesa_box_app && flutter run -d emulator-5554 --dart-define=API_BASE_URL=http://10.0.2.2:8090`
3. Every OTP code is **1234**.
4. 🌐 On the web (`http://localhost:5173`) log in as **0625689904** → Groups → **Create Group**: name **QA Test Group**, cluster **Arusha North**, admin phone **0711000021**. Open it → Financial → **Edit rules**: share value 1,000 · max 5 shares · mandatory savings 5,000 · social fund 2,000 · interest 10% · max loan 3× → Save.

PART 1 — APP

Mobile app on the emulator

A Log in and add members

2 cases

- [ ] **Q1 Log in as the new group's chairperson**

  DO App → Get started → 0711000021 → 1234.

  EXPECT the app opens **QA Test Group** and you are the Mwenyekiti.

  Result / notes: _____

- [ ] **Q2 Add 4 members**

  DO Neema (female, born 10 May 2000) · Asha (female, born 15 Jan 1980) · John (male, born 1 Mar 2005) · Peter (male, leave date of birth empty).

  EXPECT all saved; opening Neema shows her age (26).

  Result / notes: _____

B Run a meeting

9 cases

- [ ] **Q3 Overdue meeting**

  DO Meetings → create a meeting dated **yesterday**.

  EXPECT it shows a red **Imechelewa / Overdue** label, not "Unakuja". Home → **Anza mkutano** opens that meeting and tells you it is the scheduled meeting from yesterday. Start it.

  Result / notes: _____

- [ ] **Q4 Attendance**

  DO Neema present · Asha late · John absent · Peter excused.

  EXPECT the four counts are right.

  Result / notes: _____

- [ ] **Q5 Record money**

  DO Neema: savings 5,000, **3 shares**, social fund 2,000 · Asha: savings 5,000, social fund 2,000.

  EXPECT Home shows shares 3,000 and social fund 4,000. Trying 8 shares is refused (max 5).

  Result / notes: _____

- [ ] **Q6 Loan with a purpose**

  DO Loans → Record loan → Asha, 10,000, purpose **Biashara**, business type **Mama lishe**.

  EXPECT interest 1,000, total to repay **11,000**.

  Result / notes: _____

☐ **Q7 Repayment**

DO Asha repays **5,500**. Then try to repay 6,000.

EXPECT balance **5,500**; the 6,000 is refused (more than she owes).

Result / notes: _____

☐ **Q8 Social fund payout**

DO Funds → Social fund payout → John, 1,000, reason "Hospitali". Then try 5,000.

EXPECT fund goes to **3,000**; the 5,000 is refused (the fund doesn't hold that much).

Result / notes: _____

☐ **Q9 Fix a mistake**

DO Record a 5,000 savings for John, then open it in Activity → Correct / reverse → reason "wrong member".

EXPECT it shows as reversed and the savings total is back to what it was. Without a reason it refuses.

Result / notes: _____

☐ **Q10 Close the meeting**

DO Review & close. Then try to record anything in it.

EXPECT refused — "this meeting is closed".

Result / notes: _____

☐ **Q11 Switch user**

DO Log out, log in as the Katibu **0711000003**.

EXPECT you see **Mkusanyiko** only — nothing from QA Test Group. Log out again.

Result / notes: _____

PART 2 — WEB

Web dashboard · http://localhost:5173

C The group on the web

2 cases

☐ **Q12 Phone layout**

DO Make the browser narrow (phone size).

EXPECT a menu button appears in the top bar and opens the sidebar; nothing scrolls sideways.

Result / notes: _____

- [ ] **Q13** **Members and loans**

  DO Groups → QA Test Group → Members tab, then Financial tab.

  EXPECT Members show **date of birth and age** (Peter: "—"). The loan shows purpose **Biashara · Mama lishe**. Transactions tab: John's 5,000 is struck through with the reason.

  Result / notes: _____

D Monitoring page (GATA's indicators)

2 cases

- [ ] **Q14** **Numbers are right**

  DO Sidebar → **Monitoring** → Group = **QA Test Group**.

  EXPECT the numbers in this table.

  Result / notes: _____

Section	Number to check
Savings	recorded **13,000** (savings 10,000 + shares 3,000) · 2 savers
Loans	disbursed **10,000** · borrowers **1** · outstanding **5,500**
Social fund	in **4,000** · paid out **1,000** · balance **3,000**
Membership	**4** members (2 women, 2 men) · ages 15-24: 1 · 25-35: 1 · 36-59: 1 · unknown: 1 · youth **2** · attendance **50%**
Digital adoption	meetings fully recorded **1 of 1 (100%)**
Financial performance	interest earned **500**
Accountability	reversals **1** · expected cash **11,500**
Access	saving regularly **50%** · borrowing **25%**
Economic benefits	business loans **1** · business type **Mama lishe**

- [ ] **Q15** **Download**

  DO In the Savings section click a report button → Reports opens with that report → Export **PDF** and **Excel**.

  EXPECT both files open and show the same numbers.

  Result / notes: _____

E Who can see what

3 cases

- [ ] **Q16** **Partner user**

  DO New incognito window → log in as **0711000002** (GATA partner).

  EXPECT Monitoring and Reports show only GATA's groups; no Users, Audit or Settings in the menu.

  Result / notes: _____

- [ ] **Q17** **Group role on the web**

  DO Incognito → log in as **0711000021**.

  EXPECT "You don't have access" — group roles use the app.

  Result / notes: _____

- [ ] **Q18** **Audit log**

  DO As 0625689904 → Audit Logs.

  EXPECT the reversal with reason "wrong member", the social fund payout and the loan are listed.

  Result / notes: _____

PART 3 — APP + WEB: share-out (10 min)

App, then check on the web

F End of cycle

2 cases

- [ ] **Q19** **Share-out**

  DO App as 0711000021: Asha repays the last **5,500**. Meetings → **Mgao** (share-out).

  EXPECT suggested Neema **8,615** and Asha **5,384** (savings + shares + their part of the 1,000 interest). Change Asha to 6,000 → a red warning; paying it is refused. Put it back and pay.

  Result / notes: _____

- [ ] **Q20** **Share-out on the web**

  DO Monitoring → QA Test Group.

  EXPECT Financial performance: shared out **13,999**, interest earned **1,000**, returns to members **999**.

  Result / notes: _____

Results log
