HelaBox

Manual Test Cases
A → Z

Mobile app first, then the web dashboard — local test environment. Covers the user-level spec, the concept note and GATA's 11 monitoring indicators.

139	62	77
test cases in total	📱 App · sections A–L	🌐 Web · sections M–Z

📱 Part 1 — App

A	Login, language, session	7
B	Home & meetings (log in as Upendo)	5
C	Members & date of birth	5
D	Attendance & contributions (inside an open meeting)	5
E	Loans (purpose, interest, limit, repayment)	7
F	Fines & expenses	3
G	Social fund payout (new)	4
H	Reversals (money is never deleted or edited)	5
I	Government loans (loan to the group)	4
J	Share-out & close cycle (new)	6
K	Roles in the app	4
L	Rules, announcements, statements, profile	7

🌐 Part 2 — Web

M	Login, language, layout, groups	10
N	Partners & clusters (Super Admin)	5
O	Users & assignments (Super Admin)	5
P	What each role sees (one incognito window each)	6
Q	Dashboard	4
R	Record the QA Monitoring Group scenario (📱 App, as 0711000021)	7
T	Monitoring page	16
U	Reports & exports	8
V	Audit log (Super Admin)	3
W	Settings, SMS, Mobile App page	4
X	Data rules & security (web + API)	3
Y	Sessions	2
Z	Technical checks (💻 Git Bash, optional)	4

Prepared 23 October 2026 · Dephics for GATA · Tick each box when the case passes; write the result and any notes on the line below it, and log failures on the last page.

📱 **Part 1 — App (A–L)** first, then 🌐 **Part 2 — Web (M–Z)**. Work top to bottom: later cases reuse data made earlier.

Tick `[x]` when a case passes. If it fails, leave it unticked and add a row to the **Results log** at the bottom.

Covers: the client's role spec (`Pesa Box User Levels.pdf`), the concept note (`PesaBox-Concept.pdf`) and **GATA's monitoring

feedback** (the 11 indicators — see the map below). Indicator definitions: `server/MONITORING_API.md`.

0. Before you start (local only — don't test on the live server)

1. **MongoDB:** `C:\Users\Administrator\mongodb\mongodb-win32-x86_64-windows-8.0.4\bin\mongod.exe --dbpath C:\Users\Administrator\mongodb\data\db --bind_ip 127.0.0.1 --port 27017`
2. **API (port 8090):** `cd server && go build -o pesabox-server.exe . && ./pesabox-server.exe` — keep this console visible (SMS texts print here).
3. **Web:** `cd web && npm install && npm run dev` → `http://localhost:5173`
4. **App on the LOCAL server — important:** `pesa_box_app/lib/services/api_base.dart` currently has `kUseLiveServer = true`, so a normal debug run talks to the **live** server (157.245.46.244). For these tests run: `cd pesa_box_app && flutter run -d emulator-5554 --dart-define=API_BASE_URL=http://10.0.2.2:8090` (or set `kUseLiveServer = false` while testing — put it back before you build a release). Switching servers asks you to log in again ("Domain mismatch") — that's expected.

- **Dev mode:** with no Beem keys in `server/.env`, every OTP is `1234` and SMS are printed in the API console, not sent.
- **One browser window per person** on the web (a login belongs to the browser it was made in) — use incognito windows.

Test logins (local database, OTP 1234)

Level	Who	Phone	Use on	Home group / scope
1 Super Admin	You	0625689904	🌐 + 📱	everything (in the app your home group is the one you hold a position in — check the Group tab)
2 Staff — Operations	Olivia	0711000013	🌐	all groups; create/edit groups
2 Staff — Support	Samuel	0711000012	🌐	all groups; create only
2 Staff — Viewer	Stella	0711000011	🌐	GATA groups, read-only
3 Partner User	Paul	0711000002	🌐	GATA only
4 Cluster Manager	Clara	0711000004	🌐	Arusha North (Mkusanyiko) only
5 Group Admin (Mwenyekiti)	Upendo	0711000005	📱	Upendo Vikoba
5 Group Admin (Mwenyekiti)	Tumaini	0711000007	📱	Tumaini Group
6 Group Officer (Katibu)	Kassim	0711000003	📱	Mkusanyiko
7 Group Member	Mary	0711000006	📱	nothing yet (member self-service = phase 3)
new — QA group admin	QA Mwenyekiti	0711000021	📱	QA Monitoring Group (created in M7)

GATA's indicators → where to test them

#	GATA indicator	Built as	Test cases
1	Savings — total, per member, growth	Monitoring → Savings; reports *Member Savings*, *Monthly Growth*	D2–D4, T2, U3
2	Loans — disbursed, # borrowers, outstanding	Monitoring → Loans; *Loans* report	E1–E4, T3
3	Repayments — rate, overdue, defaults	Monitoring → Loan Repayments (default = 90+ days overdue); *PAR 30*	E5–E7, T4
4	Social fund — contributions, disbursements, balance	Social fund payout (new); Monitoring → Social Fund	G1–G4, T5
5	Membership — active, new, retention, attendance by **gender & age**	Date of birth on members (new); Monitoring → Membership	C1–C5, D1, T6
6	Digital adoption — groups using the app, % recorded digitally	Monitoring → Digital Adoption (👤 GATA to confirm the definition)	T7
7	Financial performance — interest, expenses, shared out, returns	Share-out (new, real); Monitoring → Financial Performance	E5, F3, J1–J6, T8
8	Accountability — accuracy, reconciliation, transparency	Reversals, audit log, totals drift, expected cash; Monitoring → Accountability	H1–H5, T9, X1–X3
9	Growth over time	Monthly series + chart; *Monthly Growth* report	T10, U3
10	Access — % saving regularly, % borrowing, avg per member	Monitoring → Access (regular = saved at ≥75% of meetings)	T11
11	Economic benefits — IGA loans, enterprise types, returns	Loan purpose + enterprise type (new); Monitoring → Economic Benefits	E1–E2, T12, U4

PART 1 — APP

Mobile app on the emulator · sections A – L

A Login, language, session

7 cases

- [ ] **A1 Unknown number refused**
  - **DO** Get started → phone 0799 123 456.
  - **EXPECT** "Namba hii ya simu haijasajiliwa..."; no code in the API console.
  - Result / notes: _____
- [ ] **A2 Login**
  - **DO** Log in as Upendo (0711000005 / 1234).
  - **EXPECT** Home shows **Upendo Vikoba**, "Habari, ...", balances (Salio la kikundi, Akiba, Hisa, Mfuko wa Jamii, Mikopo).
  - Result / notes: _____
- [ ] **A3 Branding**
  - **DO** Welcome screen and phone app list.
  - **EXPECT** **H** logo and the name **HelaBox**.
  - Result / notes: _____
- [ ] **A4 Language**
  - **DO** Profile → Settings → Language → English, then back to Kiswahili.
  - **EXPECT** every screen switches, including meeting titles ("Mkutano #1"), month names (Okt, Mac...), fine reasons and "N shares/hisa".
  - Result / notes: _____
- [ ] **A5 Deactivated account refused**
  - **DO** (after P5 on the web) try to log in as a deactivated person.
  - **EXPECT** "Akaunti hii imezimwa...".
  - Result / notes: _____

- [ ] **A6** **Dead session → login**

  DO Leave the app idle 15+ minutes and reopen it (or restart the API with the app open and pull to refresh).

  EXPECT it continues silently or returns to the welcome/login screen — **never** "Waiting for your group" for a real group admin.

  Result / notes: _____

- [ ] **A7** **Switching users clears data**

  DO Log out, log in as Kassim (0711000003).

  EXPECT only **Mkusanyiko** data — no Upendo transactions, loans or meetings left over from the previous user.

  Result / notes: _____

B Home & meetings (log in as Upendo)

5 cases

- [ ] **B1** **Overdue meeting**

  DO Meetings → schedule a meeting dated **yesterday**.

  EXPECT red **Imechelewa / Overdue** pill on Home, in the meetings list and in the meeting details (not "Unakuja").

  Result / notes: _____

- [ ] **B2** **Start screen explains itself**

  DO Home → **Anza mkutano**.

  EXPECT it opens the **earliest scheduled** meeting and says "Unaanza Mkutano #N uliopangwa kufanyika …" with its date, a warning that it's overdue, and a link to schedule a different meeting instead.

  Result / notes: _____

- [ ] **B3** **Quick action order**

  DO Start that meeting, go back Home.

  EXPECT the quick action now says **Endelea na mkutano** (continue). After closing it, it goes to the next scheduled meeting, or to **Unda mkutano** if none — never to a closed meeting.

  Result / notes: _____

- [ ] **B4** **Status pills**

  EXPECT Unakuja (future) · Imechelewa (past, not started) · Inaendelea (in progress) · Imefungwa (closed). In-progress meetings are **not** listed under History.

  Result / notes: _____

- [ ] **B5** **Closed meeting is locked**

  DO Close a meeting (Review & Close), then try attendance or money on it.

  EXPECT "this meeting is closed and can no longer be changed" (translated in Swahili).

  Result / notes: _____

C Members & date of birth

5 cases

C1 Add member with DOB

- [ ] **DO** Members → Add → "QA Neema", female, DOB 10 May 2000.
- **EXPECT** saved; member details show "Born 10 May 2000 · 26 years" (Swahili: "Alizaliwa …").

Result / notes: _____

C2 DOB optional

- [ ] **DO** Add "QA Peter", male, no DOB.
- **EXPECT** saved; details show no age.

Result / notes: _____

C3 Bad DOB refused

- [ ] **DO** Edit a member, pick a future date (if the picker allows) or an age under 10.
- **EXPECT** refused with a clear message.

Result / notes: _____

C4 Clear DOB

- [ ] **DO** Edit QA Neema → clear DOB → save → set it back.
- **EXPECT** both saves work.

Result / notes: _____

C5 Deactivate

- [ ] **DO** Deactivate a QA member.
- **EXPECT** status shows **Inactive** (not Active); they can't borrow.

Result / notes: _____

D Attendance & contributions (inside an open meeting)

5 cases

D1 Attendance

- [ ] **DO** Mark present / late / absent / excused (Ameomba udhuru).
- **EXPECT** all four cards the same height; counts correct.

Result / notes: _____

D2 Mandatory savings

- [ ] **DO** Record the configured mandatory amount for a member.
- **EXPECT** Home Akiba goes up; API console prints an SMS starting **HELABOX:**.

Result / notes: _____

- [ ] **D3 Shares**

  DO Record 3 shares.

  EXPECT "3 hisa", value = 3 × share value; a number above max shares is refused.

  Result / notes: _____

- [ ] **D4 Social fund**

  DO Record the configured social fund amount.

  EXPECT Mfuko wa Jamii goes up.

  Result / notes: _____

- [ ] **D5 Funds screen**

  DO Group → Funds.

  EXPECT Savings / Shares / Social fund rows show "in · out" in Swahili, reversed rows not counted.

  Result / notes: _____

E Loans (purpose, interest, limit, repayment)

7 cases

- [ ] **E1 Loan with purpose**

  DO Loans → Record loan → member, 10,000 → **Madhumuni: Biashara**, **Aina ya biashara: "Mama lishe"**.

  EXPECT preview shows interest + total due; loan details show "Biashara · Mama lishe".

  Result / notes: _____

- [ ] **E2 Enterprise field only for IGA**

  DO Pick purpose Elimu (education).

  EXPECT the enterprise-type field disappears.

  Result / notes: _____

- [ ] **E3 No purpose**

  DO Record a loan without purpose.

  EXPECT details show **Haijabainishwa**.

  Result / notes: _____

- [ ] **E4 Loan limit**

  DO With max loan multiplier set (Rules), ask for more than the member's limit; try a loan for an inactive member.

  EXPECT refused with the reason.

  Result / notes: _____

- [ ] **E5 Partial repayment**
  - DO Repay half the total due.
  - EXPECT balance = total due − repaid; loan stays Active.
  - Result / notes: _____

- [ ] **E6 Over-repayment blocked**
  - DO Repay more than the remaining balance.
  - EXPECT refused.
  - Result / notes: _____

- [ ] **E7 Full repayment**
  - DO Repay the rest.
  - EXPECT loan becomes Repaid; loan duration shows the loan's own term ("miezi N").
  - Result / notes: _____

F Fines & expenses

3 cases

- [ ] **F1 Fine**
  - DO Record a fine (reason from the group's list).
  - EXPECT reason shown in Swahili in the fines list.
  - Result / notes: _____

- [ ] **F2 Pay fine**
  - DO Pay it.
  - EXPECT status Paid; Home updates.
  - Result / notes: _____

- [ ] **F3 Expense**
  - DO Record an expense 1,500.
  - EXPECT it appears in activity and in Funds "out".
  - Result / notes: _____

G Social fund payout (new)

4 cases

- [ ] **G1 Who sees it**
  - DO As Upendo (Mwenyekiti) and as Kassim (Katibu): Funds → **Social fund payout** is visible (both have finance.write).
  - Result / notes: _____

- [ ] **G2 Payout**

  DO Pay 1,500 to a member, reason "Hospitali".

  EXPECT recorded; social fund balance drops by 1,500; SMS printed in the API console; activity shows "Malipo ya mfuko wa jamii".

  Result / notes: _____

- [ ] **G3 Can't overdraw**

  DO Pay more than the fund holds.

  EXPECT refused before sending ("the social fund only holds …").

  Result / notes: _____

- [ ] **G4 Reverse**

  DO Reverse the payout with a reason.

  EXPECT the fund goes back up by exactly 1,500.

  Result / notes: _____

H Reversals (money is never deleted or edited)

5 cases

- [ ] **H1 Reason required**

  DO Activity → a contribution → Correct / reverse → empty reason.

  EXPECT "Explain why…"; nothing changes.

  Result / notes: _____

- [ ] **H2 Reverse**

  DO Enter a reason → reverse.

  EXPECT balance drops back; row shows reversed; reverse button gone.

  Result / notes: _____

- [ ] **H3 Reverse a repayment**

  DO Reverse the E5 repayment.

  EXPECT the loan balance goes back up.

  Result / notes: _____

- [ ] **H4 No delete anywhere**

  DO There is no delete/edit for any money record in the app.

  Result / notes: _____

- [ ] **H5 Shows on the web**

  DO Web → that group → Transactions.

  EXPECT struck through, "reversed" badge and the reason.

  Result / notes: _____

I Government loans (loan to the group)

4 cases

- [ ] **I1 Record**
  - **DO** Group → Mikopo ya serikali → lender "QA Halmashauri", 1,000,000, interest 0, 12 months.
  - **EXPECT** Received 1,000,000; Still owed 1,000,000; Active.
  - Result / notes: _____

- [ ] **I2 Repay part**
  - **DO** 250,000.
  - **EXPECT** balance 750,000.
  - Result / notes: _____

- [ ] **I3 Over-repayment**
  - **DO** 900,000.
  - **EXPECT** translated error, refused.
  - Result / notes: _____

- [ ] **I4 Savings unchanged**
  - **DO** Home Akiba is **not** increased by the government loan.
  - Result / notes: _____

J Share-out & close cycle (new — was a mock before)

6 cases

Use the **QA Monitoring Group** after section T has been checked (its numbers are worked out there), or any test group.

- [ ] **J1 Who sees it**
  - **DO** Mwenyekiti: Meetings → cycle card → **Mgao** → with a "Also close cycle" tick box. Katibu: **Mgao** → but **no** close-cycle tick box.
  - Result / notes: _____

- [ ] **J2 Suggested amounts**
  - **DO** Open Mgao.
  - **EXPECT** each member = their savings + shares + a pro-rata share of the profit; a warning if loans are still outstanding; the total checked against cash available (cash − social fund).
  - Result / notes: _____

- [ ] **J3 Over-entitlement warning**
  - **DO** Edit one member above their suggestion.
  - **EXPECT** red line "Zaidi ya stahili ya mwanachama huyu (TZS X)"; if you submit, the server refuses and its message is shown above the button.
  - Result / notes: _____

- [ ] **J4** **Pay out**

  DO Pay the suggested amounts **without** closing the cycle.

  EXPECT one `Mgawanyo wa akiba` transaction per member; SMS per member in the API console; Funds shows a **Share-out** row "… paid · … of it profit"; Savings/Shares "out" grow by the savings/shares returned.

  Result / notes: _____

- [ ] **J5** **Reverse a share-out**

  DO Reverse one member's payout.

  EXPECT their savings/shares come back exactly.

  Result / notes: _____

- [ ] **J6** **Close cycle**

  DO Pay out again with **Also close cycle** ticked.

  EXPECT cycle number +1. Reverse all those payouts → the cycle number goes back.

  Result / notes: _____

K Roles in the app

4 cases

- [ ] **K1** **Katibu**

  DO (0711000003) — Group tab shows "Katibu/Secretary"; can record money, attendance and reversals; **no** Add/remove officer, **no** Edit rules.

  Result / notes: _____

- [ ] **K2** **Mwenyekiti adds an officer**

  DO Group → Viongozi wa kikundi → add phone 0711000099 as Committee.

  EXPECT listed; adding the same phone again → "already an officer". Remove it afterwards.

  Result / notes: _____

- [ ] **K3** **Member**

  DO (0711000006) —

  EXPECT "Waiting for your group" screen (member self-service is phase 3).

  Result / notes: _____

- [ ] **K4** **Other group's data hidden**

  DO As Tumaini (0711000007): only Tumaini Group and its TZS 50,000 loan.

  Result / notes: _____

L Rules, announcements, statements, profile

7 cases

- [ ] **L1 Rules**

DO As Mwenyekiti: Group → Rules & Constitution → Edit → change social fund amount → save.

EXPECT saved; the "Huduma" row doesn't overflow; Katibu sees no Edit button.

Result / notes: _____

- [ ] **L2 Announcement**

DO Add "QA Notice".

EXPECT listed.

Result / notes: _____

- [ ] **L3 Group statement PDF**

DO Reports → Group statement.

EXPECT opens; totals skip reversed rows; share-out and payouts labelled.

Result / notes: _____

- [ ] **L4 Member statement PDF**

DO A member → Statement.

EXPECT opens with that member's records only.

Result / notes: _____

- [ ] **L5 Settings**

DO Profile → Settings.

EXPECT SMS sender ID **TUKIIO**.

Result / notes: _____

- [ ] **L6 Offline**

DO Turn off emulator data, reopen the app.

EXPECT opens with proper fonts, no freeze.

Result / notes: _____

- [ ] **L7 Logout**

DO Profile → Log out.

EXPECT welcome screen; Back doesn't return into the app.

Result / notes: _____

PART 2 — WEB (http://localhost:5173)

Web dashboard · http://localhost:5173 · sections M – Z

M Login, language, layout, groups

10 cases

- [ ] **M1 Login**
  - DO 0625689904 / 1234.
  - EXPECT dashboard; sidebar "HelaBox Admin" + your role. Tab title **HelaBox — Admin**.
  - Result / notes: _____

- [ ] **M2 Language**
  - DO SW / EN in the top bar.
  - EXPECT no raw keys like `mon.title`; first visit opens in **English**.
  - Result / notes: _____

- [ ] **M3 Phone width**
  - DO Narrow the window to ~390px (or DevTools phone view).
  - EXPECT a **menu button** in the top bar opens the sidebar as a drawer (it closes on navigation / tapping outside); no sideways scrolling on any page.
  - Result / notes: _____

- [ ] **M4 Unknown number**
  - DO Log in with 0799 123 456.
  - EXPECT "not registered"; no code sent.
  - Result / notes: _____

- [ ] **M5 Old finance page gone**
  - DO Open `http://localhost:5173/finance`.
  - EXPECT you land on Reports (it used to show made-up figures).
  - Result / notes: _____

M6 Groups list

DO Groups.

EXPECT real groups, working pagination.

Result / notes: _____

M7 Create QA Monitoring Group

DO Create Group → name **QA Monitoring Group**, cluster Arusha North, admin phone **0711000021**; then Financial → Edit rules: share value 1,000 · min 1 · max 5 shares · mandatory savings 5,000 · social fund 2,000 · interest 10% · max loan 3× · Save.

EXPECT created; rules saved; Audit has GroupRules.

Result / notes: _____

M8 Members & loans columns

DO Upendo Vikoba → Members tab: **Date of birth** + **Age** columns (QA Neema: 10 May 2000, 26). Financial tab → loans: **Loan purpose** column with enterprise type underneath ("Biashara · Mama lishe"; old loans "Haijabainishwa").

Result / notes: _____

M9 Safe delete

DO Create "QA Delete Me" → Delete Group → deleted. Delete Mkusanyiko → refused ("has financial records").

Result / notes: _____

M10 Close / reopen group

DO Close group → Activate.

EXPECT badge changes; nothing deleted.

Result / notes: _____

N Partners & clusters (Super Admin)

5 cases

N1 Add partner

DO "QA Partner", type NGO.

EXPECT listed with 0 clusters. Empty name → error.

Result / notes: _____

N2 Add cluster

DO "QA Cluster" under QA Partner.

EXPECT listed.

Result / notes: _____

- [ ] **N3** **Move a group**
  - DO QA Delete Me (or a QA group) → Cluster dropdown → QA Cluster.
  - EXPECT header shows QA Partner › QA Cluster.
  - Result / notes: _____

- [ ] **N4** **Deactivate / reactivate**
  - DO QA Cluster.
  - EXPECT Inactive badge; nothing deleted.
  - Result / notes: _____

- [ ] **N5** **Cluster link**
  - DO Click a cluster name.
  - EXPECT Groups filtered to it.
  - Result / notes: _____

O Users & assignments (Super Admin)

5 cases

- [ ] **O1** **Add staff**
  - DO Add 0711000031 "QA Viewer", Staff / Viewer.
  - EXPECT listed.
  - Result / notes: _____

- [ ] **O2** **Assign**
  - DO + Assign → Partner → GATA.
  - EXPECT badge "Partner: GATA". × removes it, then add it back.
  - Result / notes: _____

- [ ] **O3** **Own role locked**
  - DO Your own row's role dropdown is disabled.
  - Result / notes: _____

- [ ] **O4** **Deactivate**
  - DO Click QA Viewer's Active badge.
  - EXPECT Inactive; their open browser is sent to login; logging in → "deactivated". Reactivate.
  - Result / notes: _____

- [ ] **O5** **Pending group admins**
  - DO tab "Group admins without a group" lists only admins with no group.
  - Result / notes: _____

P What each role sees (one incognito window each)

6 cases

- [ ] **P1 Staff Operations**

  DO (0711000013) — menu: Dashboard, Monitoring, Groups, Partners & Clusters, Reports, SMS. `/users`, `/audit`, `/settings` send you back. Can Create Group and Edit rules.

  Result / notes: _____

- [ ] **P2 Staff Support**

  DO (0711000012) — all groups; Create Group; **no** Edit / Close / Delete / Edit rules.

  Result / notes: _____

- [ ] **P3 Staff Viewer**

  DO (0711000011) — only GATA's groups; no create or edit buttons.

  Result / notes: _____

- [ ] **P4 Partner User**

  DO (0711000002) — only GATA; no SMS / Users / Audit / Settings; partner filter lists only GATA; no SMS datasets in Reports.

  Result / notes: _____

- [ ] **P5 Cluster Manager**

  DO (0711000004) — only Arusha North groups (Mkusanyiko, QA Monitoring Group); Create Group offers only Arusha North.

  Result / notes: _____

- [ ] **P6 Group roles on the web**

  DO (0711000005, 0711000003, 0711000006) — every page → "You don't have access… use the mobile app".

  Result / notes: _____

Q Dashboard

4 cases

- [ ] **Q1 KPI cards**

  DO Active groups, members (women/men), savings, shares, social fund, loans outstanding, PAR 30, attendance, government loans — all numbers, no "NaN".

  Result / notes: _____

- [ ] **Q2 Matches the API**

  DO Loans outstanding on Mkusanyiko's group page = Reports → Summary by Group.

  Result / notes: _____

- [ ] **Q3** **Filters & roll-up**
  DO Partner / cluster filters change the numbers; "Performance by level" by partner → click GATA → its clusters, breadcrumb back.
  Result / notes: _____

- [ ] **Q4** **Activity feed**
  DO After G2 and J4: entries read "Malipo ya mfuko wa jamii" / "Mgawanyo wa akiba" (not raw codes).
  Result / notes: _____

R Record the QA Monitoring Group scenario (App, as 0711000021) — feeds section T

7 cases

Log in to the app as **0711000021** (the QA group's admin — the first login opens the group as Mwenyekiti), then:

- [ ] **R1** **Members**
  DO QA Neema (F, DOB 2000-05-10) · QA Asha (F, DOB 1980-01-15) · QA John (M, DOB 2005-03-01) · QA Peter (M, no DOB).
  Result / notes: _____

- [ ] **R2** **Meeting #1**
  DO create for today, start; attendance: Neema present · Asha late · John absent · Peter excused.
  Result / notes: _____

- [ ] **R3** **Money**
  DO Neema: savings 5,000, 3 shares (3,000), social fund 2,000 · Asha: savings 5,000, social fund 2,000.
  Result / notes: _____

- [ ] **R4** **Loan**
  DO Asha 10,000, purpose **Biashara**, enterprise "Mama lishe" (interest 10% → total due **11,000**).
  Result / notes: _____

- [ ] **R5** **Repayment**
  DO Asha repays **5,500**.
  Result / notes: _____

- [ ] **R6** **Payout**
  DO Social fund payout 1,000 to John, reason "Hospitali".
  Result / notes: _____

- [ ] **R7** **Close**
  DO Review & close the meeting.
  Result / notes: _____

T Monitoring page — GATA's 11 indicators (🌐 Web → Monitoring / Ufuatiliaji)

16 cases

Filter **Group = QA Monitoring Group**, leave dates empty (the page then says it shows the **last 12 months**).

Each section has a "how it's calculated" line and buttons that open the matching report. Expected numbers for the R-scenario:

- [ ] **T1 Page basics**

  DO period line + "balances as at" date + scope "1 group"; 11 sections in order; works in SW and at phone width; a cluster with no groups shows the empty state.

  Result / notes: _____

- [ ] **T2 Savings**

  DO savings recorded **13,000** (savings 10,000 + shares 3,000); contributions **10,000**; shares **3,000**; savers **2**; average per saver **6,500** (Neema 8,000 / Asha 5,000).

  Result / notes: _____

- [ ] **T3 Loans**

  DO disbursed **10,000**; borrowers **1**; outstanding **5,500**.

  Result / notes: _____

- [ ] **T4 Loan repayments**

  DO overdue **0**, defaults **0** (the loan isn't due yet); repayment rate counts only loans that fell due in the period (see the hint) — so it is 0 / "—" here. Re-check after a loan passes its due date.

  Result / notes: _____

- [ ] **T5 Social fund**

  DO contributions **4,000**; payouts **1,000**; balance **3,000**.

  Result / notes: _____

- [ ] **T6 Membership**

  DO active **4** (F 2 / M 2); new **4**; age bands 15-24: **1** (John) · 25-35: **1** (Neema) · 36-59: **1** (Asha) · unknown: **1** (Peter); youth (15–35) **2**; date-of-birth coverage **75%**; attendance: present 1, late 1, absent 1, excused 1 → rate **50%** (present + late).

  Result / notes: _____

- [ ] **T7 Digital adoption**

  DO groups using the app **1 of 1**; meetings fully recorded (attendance + money) **1 of 1 = 100%**. 👤 GATA to confirm this definition.

  Result / notes: _____

- [ ] **T8 Financial performance**

  DO interest earned **500** (5,500 × 1,000 / 11,000, pro-rata); expenses **0**; shared out **0**.

  Result / notes: _____

T9 Accountability

DO reversals **0**; expected cash on hand **11,500** (in 10,000 + 3,000 + 4,000 + 5,500 − out 10,000 − 1,000); audit entries > 0 (Super Admin only).

Result / notes: _____

T10 Growth

DO this month's bar shows savings + shares 13,000 and loan portfolio 5,500; the *Monthly Growth* report has 12 rows.

Result / notes: _____

T11 Access

DO saving regularly **2 of 4 = 50%** (Neema, Asha saved at 100% of meetings); borrowing **1 of 4 = 25%**.

Result / notes: _____

T12 Economic benefits

DO loans by purpose: Biashara **1**; IGA borrowers **1** (Female, 36-59); enterprise types: "Mama lishe" **1**.

Result / notes: _____

T13 Reversal moves the numbers

DO In the app reverse R5 (Asha's 5,500).

EXPECT outstanding **11,000**, interest earned **0**, reversals **1**, expected cash **6,000**. Record the 5,500 again afterwards.

Result / notes: _____

T14 Share-out numbers

DO In the app Asha repays the remaining **5,500** (loan Repaid). Mgao suggests Neema **8,615** (8,000 + 615 profit) and Asha **5,384–5,385** (5,000 + her 384.6 share) — profit 1,000 = the interest. First try Asha **6,000** → refused: "TZS 6,000 is more than this member can receive (TZS 5,385 …)". Then pay out the suggestions (J4).

EXPECT Monitoring → Financial performance: shared out **13,999**, returns to members **999**, interest earned **1,000**; Accountability: expected cash **≈ 3,001** (the social fund 3,000 stays in the box).

Result / notes: _____

T15 Scope

DO As Clara (cluster manager): Monitoring shows only Arusha North groups. As Paul (partner): only GATA. Group roles: no Monitoring at all. SMS/audit counts are hidden from roles without SMS/audit access.

Result / notes: _____

T16 Bad dates

DO From after To → error (400), no numbers.

Result / notes: _____

U Reports & exports

8 cases

- [ ] **U1 Every dataset loads**

  DO Reports → preview each dataset with no filter, a date range, a partner, a cluster, a group.

  Result / notes: _____

- [ ] **U2 New datasets**

  DO *Monitoring Summary*, *Members by Age*, *Member Savings*, *Loans by Purpose*, *Loans by Enterprise*, *Monthly Growth*, *Social Fund Payouts*, *Share-outs*.

  EXPECT rows match section T for QA Monitoring Group.

  Result / notes: _____

- [ ] **U3 Member savings & growth**

  DO *Member Savings* lists each member's savings/shares; *Monthly Growth* 12 months.

  Result / notes: _____

- [ ] **U4 Loans report**

  DO has **Purpose** and **Enterprise Type** columns; *Members* report has **Date of Birth** and **Age Band**.

  Result / notes: _____

- [ ] **U5 Export**

  DO Tick several datasets → PDF, Excel, CSV.

  EXPECT files `helabox-…`, non-empty, Swahili/English headers per language, TOTAL row bold.

  Result / notes: _____

- [ ] **U6 Link from Monitoring**

  DO On Monitoring click a section's report button.

  EXPECT Reports opens with the same filters and previews that dataset.

  Result / notes: _____

- [ ] **U7 Scope**

  DO As Paul: only GATA in filters and exports; no SMS datasets.

  Result / notes: _____

- [ ] **U8 Dates**

  DO From after To → error; a day with no data → 0 rows; dates shown in East Africa time.

  Result / notes: _____

V Audit log (Super Admin)

3 cases

- [ ] **V1 Entries**
  DO Audit Logs shows: partner/cluster/user/assignment changes, group rules, money recorded, **reversals with reason**, social fund payout, share-out, government loan.
  Result / notes: _____

- [ ] **V2 Filters**
  DO by action and date range.
  Result / notes: _____

- [ ] **V3 Hidden**
  DO As Paul, `/audit` → sent away.
  Result / notes: _____

W Settings, SMS, Mobile App page

4 cases

- [ ] **W1 Settings**
  DO provider Beem Africa, sender TUKIIO, "Dev mode (no Beem keys)", real admin list.
  Result / notes: _____

- [ ] **W2 SMS switch**
  DO Toggle Transactional SMS off → refresh → still off → turn back on.
  Result / notes: _____

- [ ] **W3 SMS page**
  DO KPI cards fit at phone width; templates start with `{BRAND}:`; payout/share-out SMS types have proper names.
  Result / notes: _____

- [ ] **W4 Mobile App page**
  DO `/admin/app`: upload an APK → `GET /api/public/app` shows it available; landing page shows the download.
  Result / notes: _____

X Data rules & security (web + API)

3 cases

- [ ] **X1 No money delete**
  DO No delete/edit for transactions anywhere on the web.
  Result / notes: _____

- [ ] **X2 GraphQL can't delete or write money**

  DO logged-out: `curl -s -H 'Content-Type: application/json' localhost:8090/graphql -d '{"query":"{ groups { id } }"}'` → `{"data":{"groups":[]}}`.

  Result / notes: _____

- [ ] **X3 Totals drift**

  DO `/api/admin/totals-drift` (as Super Admin, in the browser) lists any group whose stored totals differ from the computed ones — expect none for QA Monitoring Group.

  Result / notes: _____

Y Sessions

2 cases

- [ ] **Y1 Web logout**

  DO Logout → browser Back → stays on login.

  Result / notes: _____

- [ ] **Y2 Deactivated person kicked out**

  DO O4.

  Result / notes: _____

Z Technical checks (💻 Git Bash, optional)

4 cases

- [ ] **Z1 go build ./server/ && go vet ./server/ && go test ./server/**

  DO `go build ./server/ && go vet ./server/ && go test ./server/` → ok

  Result / notes: _____

- [ ] **Z2 cd web && npx vite build**

  DO `cd web && npx vite build` → ok

  Result / notes: _____

- [ ] **Z3 cd pesa_box_app && flutter analyze && flutter test**

  DO `cd pesa_box_app && flutter analyze && flutter test` → only the 10 old info hints; all tests pass

  Result / notes: _____

- [ ] **Z4 Before a release build of the app: kUseLiveServer / API URL points whe**

  DO Before a release build of the app: `kUseLiveServer` / API URL points where you intend.

  Result / notes: _____

👤 Open questions for GATA

1. **Digital adoption** — all HelaBox records are digital, so "% recorded digitally" is measured as % of meetings fully recorded (attendance + money). OK?

2. **Cash reconciliation** — the app has no physical cash count; we show *expected* cash on hand. Do they want a "cash counted" field at meeting close?
3. **Default** = more than 90 days overdue; **regular saver** = saved at ≥ 75% of meetings; **youth** = 15–35. Confirm.
4. **Share-out** doesn't require all loans repaid first (the app warns). Confirm the policy.
